EXPERIENCE

HCI Research Assistant (XR Systems)

Jun 2025 – Sep 2025

UBC Okanagan – Human-Computer Interaction Lab

Kelowna, BC & Remote

- Contributed and maintained a real-time VR to large-curved-display collaboration system in Unity/C#, prioritizing system stability and responsiveness.
- Integrated motion capture and unified input handling across VR and non-VR systems for consistent spatial interaction.
- Implemented structured logging using Firebase DB to capture latency, task performance, and user interaction data.
- Produced clear technical documentation to support system hand-off and cross-team collaboration.

Frontend Developer (Capstone Project)

May 2025 – Aug 2025

UBC Okanagan – Software Engineering Capstone

Kelowna, BC

- Developed a role-based TA management platform with emphasis on workflow reliability and predictable system behavior.
- Implemented multi-step application workflows and dashboards using React (Vite) with Django/MySQL in Dockerized environments.
- Identified and resolved blocking issues affecting data flow, validation, and user submissions.
- Tested components using Jest and React Testing Library to reduce failure cases and improve error handling.

Infection Control Screener

Jul 2020 – Aug 2021

Lions Gate Hospital

North Vancouver, BC

- Supported frontline hospital operations during COVID-19, managing high-volume entry screening under time-critical conditions.

PROJECTS

Wings of Legacy | *Unity, C#, Cinemachine, Blender*

- Built a third-person hummingbird flight prototype with a custom character controller, tuned lift and drag curves, and a Cinemachine camera that steers with the bird's momentum.
- Modeled, rigged, and animated all assets in Blender; optimized the flight loop to eliminate stutter and input lag.

Game of Amazons AI | *Java, Minimax, Alpha-Beta Pruning*

- Built a competitive game-playing AI using alpha-beta pruning, iterative deepening, and Zobrist hashing for move optimization.
- Designed a Voronoi-based territory heuristic that treats the board as a spatial influence map; placed 3rd out of 22 teams.

Eudaimonia | *React, Node.js, Express, OpenAI API*

- Sole developer of a full-stack wellness app featuring AI-guided advice, a prompted journal, Pomodoro timer, and task tracker.
- Wired a custom Express backend to the OpenAI API with a therapist-framed prompt system; deployed on Heroku.

EDUCATION

University of British Columbia Okanagan

Kelowna, BC

B.Sc. in Computer Science

Sep 2019 – Aug 2025

TECHNICAL SKILLS

Languages: Python, Java, C#, SQL, JavaScript, HTML/CSS

Frameworks / Engines: Unity, React, Django, Node.js, WebGL

Systems / Tools: Git, Docker, Firebase, Heroku

Design & 3D: Figma, Blender, UX research, interaction design
